Tenths on a hundred grid

Check the digit calculation and the size of the product separately.

Mark the first factor in rows, the second in columns. Each small cell is one hundredth.

Use horizontal dashes for rows and vertical dashes for columns. Count the cells with both.

Q1 0.6 × 0.4

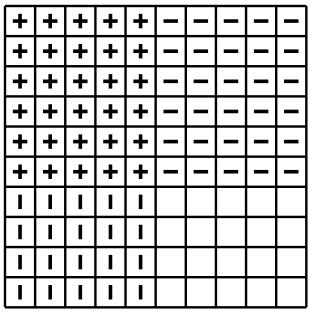

Overlap: 24 of 100 cells

Decimal product: 0.24

0.4 < 1, so the product is less than 0.6.

Q2 0.6 × 0.5

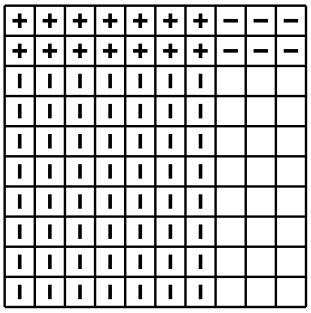

Overlap: 30 of 100 cells

Decimal product: 0.3

0.5 < 1, so the product is less than 0.6.

Q3 0.2 × 0.7

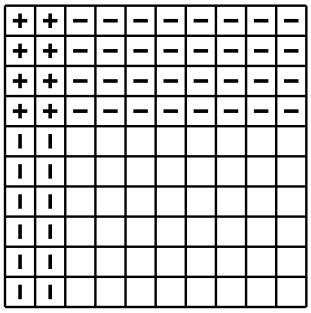

Overlap: 14 of 100 cells

Decimal product: 0.14

0.7 < 1, so the product is less than 0.2.

Q4 0.4 × 0.2

Overlap: 8 of 100 cells

Decimal product: 0.08

0.2 < 1, so the product is less than 0.4.
