Fractions × whole numbers

Name _____ Date _____

Write the whole number over 1. Give each product in simplest form.

Q1 $\frac{2}{3} \times 6$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q2 $\frac{7}{12} \times 5$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q3 $\frac{8}{11} \times 11$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q4 $\frac{1}{6} \times 8$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q5 $\frac{1}{3} \times 3$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q6 $\frac{9}{10} \times 11$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q7 $\frac{5}{7} \times 7$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____

Q8 $\frac{4}{5} \times 8$

Numerators _____
Denominators _____
Product before reducing _____
Simplest form _____
